TS629G

IBM Spectrum Protect 8.x Advanced Administration, Tuning and Troubleshooting

IBM Spectrum Protect is an enterprise data protection solution designed to help you streamline your data protection processing, reduce the cost of storage, and provide the flexibility and security to meet any service level agreement. IBM Spectrum Protect optimizes storage utilization by using incremental forever as well as block-level backup and replication, policy-based data management, and an intuitive interface, the Operations Center.

In this course, you learn how the use of two or more Spectrum Protect servers provides more options for data movement in the environment, like replication to multiple targets. You also use IBM Cloud Object Storage to create a storage pool for backups and long-term retention. The bulk of the administrative tasks are performed using the Operations Center and Command Builder which provides a command line interface for all servers configured in the Operations Center. This course also includes scripting, performance tuning, protecting, and recovering the database and storage pools, and an introduction to IBM Spectrum Protect Plus.

The hands-on exercises are performed on three different IBM Spectrum Protect servers, two on Windows, and one on Linux, with additional systems added to provide the IBM Cloud Object Storage environment.

This course is the second in a two-course series. It is for Spectrum Protect administrators who are familiar with the daily management tasks on a single server, and focuses on incorporating more advanced features, including replication and use of cloud object storage. Basic concepts and installation are not covered in this course.

The first course in the series TS619G - IBM Spectrum Protect V8.x - Implementation and Administration covers installation and basic administration of a single server.

Kursinhalt
• IBM Spectrum Protect in a multi-server environment
• Storage Pool Management Overview
• Multi-Server Management
• Long-term Retention
• Client Functions and Management
• Daily Maintenance and Monitoring
• Automation and Scripting
• Performance Tuning
• Troubleshooting and Recovery
• IBM Spectrum Protect additional products

In diesem Kurs erhält jeder Teilnehmer die englischsprachigen Original-Unterlagen von IBM.

Zielgruppe
Implementers and administrators who have experience with IBM Spectrum Protect.

Voraussetzungen
You should be able to perform the following skills managing an IBM Spectrum Protect environment before taking this course:

• Explain the primary components of IBM Spectrum Protect
• Install a Spectrum Protect server, backup-archive client, Client Management Services, and Operations Center
• Complete initial configuration of the server and client
• Configure and manage client options
• Define and manage storage pools in a single server environment
• Launch and navigate the administrative and client interfaces
• Manage the IBM Spectrum Protect database and recovery log
• Create and manage storage pools and storage pool volumes
• Configure a media library and manage tape media
• Create policy to meet business requirements
• Back up, restore, archive, and retrieve client data
• Protect the IBM Spectrum Protect environment
• Schedule basic administrative tasks
• Monitor server and client messages and events

Stand 28.04.2024

ExperTeach

Unser Trainingsangebot für Sie:

Classroom Training
Das Live-Trainingserlebnis in unseren Training Centern oder bei Ihnen vor Ort.

Online Training
Nehmen Sie online am Kurs teil – ohne Reise- und Hotelaufwände.

Hybrid Training
Classroom & online in einem Kurs – Sie wählen, wie Sie teilnehmen möchten.

Inhouse-Schulungen
Für Ihr Projekt erstellen wir genau passende Trainingskonzepte.

Garantierte Kurstermine
Die ExperTeach Garantietermine geben Ihnen Sicherheit für Ihre Planung.
